

Report of Advanced International Cadaveric Workshop at Pskov State University, Russia (18th-21st June 2023)

1. General:

As a part of the Facial Aesthetics Course - 2022 conducted by I.T.S Dental College, Ghaziabad in association with Center for Facial Aesthetic Training (CFAT), three (03) fellowship course participants visited Pskov State University, Russia for the Advanced International Cadaveric Workshop from 18th-21st June 2023.

2. Objectives:

The objective of the International Workshop was to make the participants learn about the theory behind the various advanced aesthetic procedures and how it applies to facial anatomy.

3. About the Program:

- **Day 1:** The participants landed at Moscow Airport from where they checked in to Hotel and went to explore the Moscow Square. They all had an amazing experience while exploring the streets of Moscow and had a great time during local sightseeing. In evening, they boarded the local train for Pskov, Russia.
- **Day 2:** The team reached Pskov University, Russia where a series of lectures was conducted by Dr. Musashov O.V about the anatomy of Head and Neck, Action of muscles on facial expressions and Muscles of Mastication which was followed by an exhilarating 3D visual experience of anatomical structures of head & neck on 3D computer screen. This was followed by lunch. Also, a Lecture & Demonstration on Fillers based Injection Techniques by Dr. Alexandra Kulanova, Dermatologist & Cosmetologist was conducted.

Dr. Devi Charan Shetty
Director-Principal

Delhi-Meerut Road, Muradnagar
Ghaziabad-201206

- **Day 3:** The Day 03 began with an informative lecture on "Mono & COG Threads Application in Facial Aesthetics" delivered by Dr. Alexey Svyatgor, Dermatologist & Cosmetologist from Aptos. This was followed by demonstration of application of Mono & COG threads on patients for development of the Ogee Curve on cheek bone i.e. sign of youthful appearance.
- **Day 4:** The day 04 started with the thrilling Cadaveric Hands-on experience for different fillers based, threads based injection techniques followed by Cadaveric dissection. The participants did fillers based injection on malar bone, naso-labial fold area, lips and angle of mandible on cadaver. Also, they had Hands on experience for application of threads on the base of mandible. This was followed by distribution of Fellowship Certificates from Pskov State University, Russia to all the participants.
- To delightfully conclude this astounding trip, the entire team embarked on an excursion to the spectacular places in Moscow & Pskov.
- All the lectures were translated to English by a live translator present during all the lectures which was made available by Pskov State University, Russia.

4. **Attendees :**

The following is the summary of attendees for the programme:

- a) No. of registered participants from I.T.S Dental College, Ghaziabad : 03
- b) No. of members from Center for Facial Aesthetic Training (CFAT) : 04
- c) Total Attendees for the Workshop : 07

5. **Outcome:**

The participants had a new Clinical and theoretical learning experience with exposure to international standards in Facial Aesthetics.

6. Conclusion:

Our sincere thanks to our Honorable Vice Chairman, L.T.S-The Education Group, Shri. Arpit Chadha for his invaluable support in providing this incredible learning opportunity blended with a convivial tour.

7. Pros:

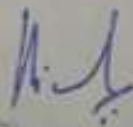

1. Extensive & informative lectures from experienced doctors of Pskov University, Russia were conducted.
2. Good clinical exposure and newer techniques/updates in aesthetics were discussed.
3. More confidence to step up facial aesthetics practice

8. Shortcomings:

1. Language barrier for communication while travelling from one place to another.

9. List of Documents:

S. No	Name of Documents
1	Flex Design
2	Photographs of Advanced International Cadaveric Workshop.

INTERNATIONAL STUDENT EXCHANGE PROGRAM
UNIVERSITY OF BARCELONA
20-24th NOVEMBER 2022

Students of the **Implantology Course** conducted by **I.T.S Dental College, Ghaziabad** visited **University of Barcelona** from 20-24th November 2022 as part of the International Student Exchange Program for great Clinical and theoretical experience in Implantology.

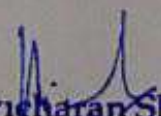

In the beginning of day 1, students landed at Spain from where they moved to Ileda. They all had an amazing experience while exploring the streets of Spain and had a great time during local sightseeing.

On day 2, the team went for a visit to GMI factory. First a lecture was conducted by Mr Pablos about how the GMI implants were manufactured right from the designing, manufacturing of prototype, FEM studies to discuss stress pattern, in vitro study, animal studies and then human trials. Everyone then went around the factory and were explained in detail about the manufacturing process right from choice of raw material, then machining of implants, their surface treatment, cleaning and disinfection protocol. This was again followed by lecture on varieties of GMI implants, their critical analysis, their indications, strengths and limitations. This was followed by lunch and certificate distribution by the GM of the company

Day 3 began with a visit to University of Barcelona where a lecture was delivered by Professor Inaki Cercadillo on "How to predict success in Full Arch Immediate Loading Rehabilitation". The lecture was very informative and well supported by many case presentations. Various factors related to the success of implant placements were elaborately discussed during the lecture. This was followed by visit to the Dental hospital where we observed the work flow of the clinical wing where each intern was given a separate cubicle integrated with RVG and DC X-Ray and well equipped with all the necessary armamentarium. Implant wing had Dynamic navigation system as an adjunct for better guidance of implant placement in complicated zones. This was followed by distribution of diploma certificates.

To delightfully conclude this astounding trip, the entire team embarked on a 4 day excursion to the spectacular places in Europe like Rome and Paris.

Our sincere thanks to our Honourable **Vice-Chairman, I.T.S- The Education Group, Mr. Arpit Chadha**, for his invaluable support in providing this incredible learning opportunity blended with a convivial tour.

OBSERVATIONS-

Pros-

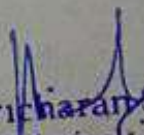

- This was an amazing learning experience where the students learnt not only the manufacturing details of an implant but also the intricacies of various parameters for selecting an implant.
- Hospitality was good and travel was very well taken care of.

Cons-

- We regret that we were denied the opportunity to talk to senior faculty members.
- Our visit to the hospital was short and restricted and we were not allowed to visit various other clinical departments and pre-clinical sections.

SUGGESTIONS-

- Comprehensive clinic for the undergraduates (preferably interns) where they will be allowed do treatments of all specialities at one place.
- Procurement of Dynamic navigation system can be considered in near future for academic purpose which would aid in complicated implant placement cases in Implantology department and also for locating canals in cases of calcifications and various other complex anatomical variations in Endodontics.
