**(BDS-017(N))**

**Time : Three Hours ] [Maximum Marks : 70**

**Note :** Attempt **all** questions. Separate copy  
for **Part-I** and **Part-II**.

**Part - I**

1. What are the risk factors, different clinical presentations, signs and symptoms of Oral Cancer. Also describe different approaches in management of pain & other complications associated with Oral Cancer. 10

**P.T.O.**

2. A 30 year old male patient presents with multiple tender oral ulcers since past 3 days. How will you differentiate whether these ulcers are herpetic, aphthous or due to Erythema Multiforme. Also discuss in detail treatment of Erythema Multiforme. 10

3. (a) Investigations and treatment of a patient with Sjogren's syndrome. 5  
(b) Proliferative Verrucous Leukoplakia 5  
(c) Managing Myofacial Pain of Masticatory Muscles. 5

### Part - II

4. What are BREMSSTRAHLUNG RADIATIONS? Describe in detail factors affecting shape & size, quality and quantity of X-ray beam. Also add a note on Compton Scattering. 10

**5151(N)/2**

5. Classify Conventional & digital Image receptors. Discuss in detail different types of digital Image receptors. Also differentiate between digital and conventional intraoral Radiographic Image. 10
6. (a) Radiographic features of Hyperparathyroidism in long bones, skull and Jaws. 5
- (b) Radiological description and Radiological differential diagnosis of Ameloblastoma. 5
- (c) Stochastic effects of Radiations & TLD Badge. 5

**(BDS-017)**

*Time : Three Hours ] [Maximum Marks : 70*

**Note :** Attempt **all** questions. Separate copy  
for **Part-I** and **Part-II**.

**Part-I**

1. Classify oral ulcerative, Vesicular and Bullous lesions. Discuss in detail recent trends in the diagnosis and treatment of recurring oral ulcers. 10

P.T.O.

2. Enumerate various endogenous pigments causing oro-facial Pigmentation. Classify melanin associated oral pigmentation and discuss in detail oral melanosis associated with systemic & Genetic diseases. 10
3. (a) Burning Mouth syndrome 5  
(b) Oral health considerations and complications while managing a hepatitis patient. 5  
(c) Differential diagnosis and investigations in a patient with a single non-healing ulcer on lateral border of tongue. 5

### **Part-II**

4. Define an ideal radiograph. Discuss in detail various factors affecting the radiographic quality of a diagnostic film. 10

**5151 (N)/2**

5. Enumerate various conventional skull projections along with their main indications. 10
6. (a) Different techniques for localization of an impacted canine in maxillary region. 5
- (b) Principles of Radiation Protection & architectural planning of a fully functional radiology set-up. 5
- (c) Conventional and advanced modalities for salivary glands Imaging. 5

for **Part-I** and **Part-II**.

**Part-I**

1. Define and classify Premalignant lesions.  
Discuss aetiology, clinical features  
and management of oral submucous  
fibrosis. 10
2. Classify Pigmented Lesions of the Oral  
Cavity. Discuss in detail about Exogenous  
Pigmentation. 10

**P.T.O.**

3. (a) Clinical features of oral candidiasis 5  
(b) Lab investigations for HIV injection 5  
(c) Fordyce's granules 5

**Part-II**

4. Define Latent Image. Discuss composition and role of each ingredients of developer and fixer. 10
5. Classify cyst of orofacial region. Describe clinical features, radiographic features and differential diagnosis of Dentigerous Cyst. 10
- 6 (a) Discuss advantages and disadvantages of Bisecting Angle Technique 5  
(b) X-ray tube 5  
(c) Heel effect 5

**Part-I and Part-II.**

**Part-I**

1. Classify Red and white lesions of the oral cavity.  
Discuss in detail about OSMF. 10
2. Classify TMJ disorders. Write in detail about MPDS. 10
3. Write short notes on :
  - (a) Erythema Multiforme 5
  - (b) Sialolithiasis 5
  - (c) Burning Mouth Syndrome 5

**5151(N)**

**[P.T.O.]**

( 2 )

## Part-II

4. What is digital Imaging ? Write in detail about CCD. 10
5. Draw a neat labelled diagram of X ray tube. Discuss in detail about production of X rays. 10
6. Write short notes on :  
(a) Grids 5  
(b) Advantage & Disadvantages of OPG 5  
(c) Developer Composition. 5

5151(N)

3. Write short notes on:

- (a) Myofascial Pain Dysfunction Syndrome.

5

- (b) Exfoliative Cytology.

5

- (c) Sjogren's Syndrome.

5

#### PART-II

1. Describe the principle of Panoramic Radiography. Mention its indications, advantages and disadvantages. Enumerate common errors encountered on a Panoramic radiograph.

10

5. Discuss in detail measures to be taken in a dental office to prevent radiation hazard to patient and operator.

10

6. Write short notes on:

- (a) Xeroradiography.

5

- (b) SLOB Technique.

5

- (c) Latent Image.

### Oral Medicine & Radiology

(BDS-017)

Time : 3 Hours

Max. Marks : 50

Note: Attempt all questions, answer part A and part B in separate answer books. Draw diagrams and flow chart wherever necessary.

#### Part 'A'

1. Discuss the oral manifestations of HIV-AIDS and describe the related investigations. 8

2. Write note on :

(a) Myofascial pair dysfunction syndroms. 3

(b) Oral Cardidiasis. 3

(c) Differential diagnosis of Lichen Plarus. 3

→ Leukoplakia

→ Candidiasis

→ Pemphigus

→ Leprosy

→ Cheek biting

→ Ectopic geographic tongue

→ White sponge nevus

213  
5151/440/2

3. Write in detail : 829

- (a) Name the various oral fibro osseous lesions of jaws  
and discuss the clinical, radiographic features and  
differential diagnosis of fibrous dysplasia. 4
- (b) Discuss in detail post herpetic Neuralgia. 4

### Part - B

1. Describe with diagram the different technique of intra-  
oral radiography? 7

2. Write short notes on :

- (a) Intensifying screen. 3
- (b) Technique of object localization. SW 3
- (c) Grid 3

3. Short notes on :

- (a) Panoramic Radiography. TOP 177 3
- (b) Effective focal spot. 3
- (c) Radiographic features of calcifying Epithelial  
odontogenic cyst. Q46 3

CEOC —x—

Part - A

1. Classify Red & White lesions affecting the Oral cavity.  
Write in detail about etiology, clinical features and Management of Oral submucous fibrosis. 10

P.T.O.

2. Classify Temporomandibular disorders. Write in detail about Myofacial Pain Dysfunction Syndrome (M.P.D.S.)

10

- (b) Composition of Developer solution.  
(c) Intensifying Screens.

M165

3. Write short notes on any two:

- (a) Trigeminal Neuralgia  
(b) Oral Manifestations of AIDS.  
(c) Recurrent Aphthous Ulcers.

#### Part - B

4. Define Radiation Biology. Write in detail about oral changes associated with radiotherapy.

M155

5. Draw a neat labelled diagram of an X-ray tube. Write in detail about factors controlling production of X-rays.

Q6

10

6. Write short notes on any two:

- (a) Radiographic features of Ameloblastoma of the mandible

Oral Medicine & Radiology I<sup>st</sup> Q. (a)

Paper-VII

(BDS-017)

Time : Three Hours { Maximum Marks : 50 }

Note: Attempt all questions answer Part 'A' and Part 'B' in separate answer books. Draw diagrams and flow charts wherever necessary.

### PART-A

1. Ram Prakash a male patient of age fifty yrs. comes to you with a mixed red and white lesion on his both right and left buccal mucosa, what type of lesion is this, give its classification, differential diagnosis, clinical features & management of any one such type of lesion? 8
2. Write short notes on following :
  - (a) ALARA 3
  - (b) TMJ Imaging 3
  - (c) Fogging of X-ray films 3
3. Describe briefly the following :
  - (a) MPDS 4
  - (b) Importance of history taking and biopsy? 4

5151/300/2

(1)

P.T.O.

### PART-B

4. What are safety measures in radiology and what kind of precaution do you take if pregnant lady comes to you for an x-ray? 8
5. Write short notes on the following: 20.0  
(a) Oral aspects of metabolic diseases. 3  
(b) Bechet's Syndrome 3  
(c) Investigation for HIV/AIDS and Hepatitis 3
6. Describe briefly the following:  
(a) Differential diagnosis of swelling at the angle of jaw (Radiographic Interpretation) 4  
(b) Processing of X-ray films? 4

Ques. No. 4. What are safety measures in radiology and what kind of precaution do you take if pregnant lady comes to you for an x-ray?

Ans. Safety measures in radiology include:

- Wearing lead aprons to protect the patient from unnecessary radiation.
- Using low dose settings for children and pregnant women.
- Maintaining appropriate distance between the patient and the x-ray tube.
- Ensuring proper shielding of sensitive organs like the gonads.
- Using digital imaging techniques to reduce radiation exposure.

Precautions for pregnant ladies:

- Contraindication for x-rays during pregnancy.
- Use of lead aprons to protect the abdomen.
- Switching to digital imaging if possible.
- Avoiding unnecessary scans.

3. Describe briefly the followings:

$$4 \times 2 = 8$$

- (a) Oral manifestations of AIDS
- (b) Pernicious Anemia

### **Part - B**

What are screen films? Describe composition and functions of intensifying screens.

5. Write short notes on the following : 3x3

- a) Radiographic features of osteosarcoma.
- b) Computed Tomography.
- c) Sialography.

Describe briefly the following : 4x2

- a) Radiation safety in Dental radiology.
- b) Describe principle of OPG and discuss briefly the advantages and disadvantages of OPG.

Paper-VII

Oral Medicine & Radiology  
(BDS-017)

**5151**

Time : Three Hours

/Maximum Marks : 50

Note : All questions have to be attempted.

1. Classify Cysts of the Oral Cavity. Describe  
Dentigerous cysts in detail 10

Or

Discuss the differential diagnosis of Vesico-bullous  
lesions of oral cavity.

2. Discuss Oral Manifestations of HIV/AIDS 10

Or

Discuss the management of a patient with Bleeding  
Disorder in Dentistry. ( = )

5151 : 500 \ 3

Roll No. ....

P.T.O.

3. Write short notes on the following:

- (a) Trigeminal Neuralgia  
(b) Hemophilia B  
(c) Scurvy.

10  
(4,3,3)

Or

- (a) Endocarditis Prophylaxis in Dental Practice.  
(b) Oral Manifestations of Diabetes  
(c) Geographic Tongue.

10  
4. Discuss the effects of Radiation on oral and para-  
oral tissues.

Or

Discuss the Techniques of intra-oral radiography with  
clinical applications.

10  
(4,3,3)  
5. Write short notes on the following:

- (a) Xeroradiography  
(b) OPG  
(c) Radiation Prophylaxis in Dentistry.

Or

3  
(a) Role of CT Scan in Dental Diagnosis

- (b) Medico-legal importance of Dental Radiography  
(c) Osteoradionecrosis of Mandible.

Paper VII

ORAL MEDICINE & RADIOLOGY ROENTGENOLOGY

(BDS-017)

Time : Three Hours /

/ Maximum Marks : 50

**Note :** Attempt any **five** questions. All questions carry equal marks. Parts of a question should be attempted together.

**X** Classify disorders of TMJ? Write in detail about  
M P D S.

**X** Describe the X-ray processing solutions in detail. Add a note on faulty radiographs.

10

3. Write short notes on the following :

a) Oral manifestations of renal disorders 4

b) Occlusal radiographs 3

**X** A.O.T. **X** U3

4. Write short notes on the following : 3

(a) Erythema multiforme

(b) Intensifying screens

(c) Mumps.

3

3

10

- (b) Aneurysl. 3  
bone cyst 3

(c) Pericoronitis.

Write in detail about the complications of 10  
radiotherapy?

6. Describe briefly :

- (a) Film Density  
(b) Collimation  
(c) Trigeminal Neuralgia.

3

3

7. Classify red and white lesions and write in 10  
detail about oral lichen planus.

8. Write in short about :

- (a) Gingival Enlargements 4  
(b) Cicatricial Pemphigoid. - 835, 800  
(c) Oral manifestations of diabetes mellitus.

3

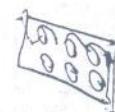

3

9. Write briefly about :

- (a) Periapical cemental dysplasia

Oral Medicine & Radiology

(BDS-017)

Time : Three Hours / Maximum Marks : 50

Note : Attempt any five questions. All questions carry equal marks. Parts of a question should be attempted together.

1. Classify salivary gland disorders and write in detail about Sjogren's syndrome. 10
2. Describe in detail the complications of cancer therapy and management of the same. 10
3. Write short notes on the following :
  - (a) Cyclic neutropenia 3
  - (b) Scleroderma 4
  - (c) ANUG. 3

(2)

4. Describe the management of :

- (a) Herpes simplex virus infections 3
- (b) Burning mouth syndrome 3
- (c) Lichen planus. 4

(3)

- 9. Write short notes on the following :
  - (a) Water's view 3
  - (b) Developer solution 4
  - (c) Radiographic mottle. 3
- 10. Describe in detail the common causes of faulty radiographs. 10

5. Write short notes on the following :

- (a) Oral manifestation of AIDS 4
- (b) MPDS 3
- (c) Angioneurotic edema. 3

6. Describe in detail the factors controlling X-ray beam ? 10

7. Write short notes on the following :

- (a) Bite Wing Radiographs 3
- (b) Dosimetry 4
- (c) Density of a Radiograph. 3

8. Describe the radiographic appearance of :

- (a) Hyperparathyroidism 4
- (b) Osteosarcoma 3
- (c) Periapical cemental dysplasia. 3

Time : Three Hours ]

[ Maximum Marks : 50

Note : Attempt any Five questions. All questions carry equal marks. Parts of a question should be attempted together.

- ✓ 1. Discuss Myofacial Pain Dysfunction Syndrome and its treatment. 10
2. Give the signs, symptoms, diagnosis and differential diagnosis of PAROTITIS. 10
- ✓ 3. Write short notes on :  
(a) ELISA test 4  
(b) Fluorosis 3  
(c) Cold Abscess. 3
4. Describe the significance in dental surgery of important cardio-vascular diseases. 10

5151 \ 100 \ 2

P.T.O.

5. Write short notes on :

- (a) Age-related changes in Periodontal diseases 4
- (b) Osteogenesis Imperfecta 3
- (c) Lazy Leukocyte Syndrome. 3

Classify various types of Leukemias and their oral manifestations.

10

- ✓ 7. What are the various hazards by X-ray Radiations? Give in detail their effects on the oral cavity.

*early  
late*

10

- ✓ 8. Describe in detail the Radiological technique for taking P.A. View of Maxillary sinuses.

10 *water's*

*37°*

- ✓ 9. Write short notes on :

- (a) Use of Radio-opaque diagnostic media
- (b) Secondary Radiation
- (c) Cassettes.

4

3

3

*Scattered*

*Captions*

- ✓ 10. Write short notes on :

- (a) Utility of X-rays in Endodontic Procedures 4
- (b) Bitewing films 3
- (c) Potter Buckey diaphragm. 3

Oral Medicine & Radiology

(BDS-017)

Time : Three Hours / Maximum Marks : 50

Note : Attempt any Five questions. All questions carry equal marks. Parts of a question should be attempted together

1. Enumerate the vesiculo-bullous lesions affecting the oral cavity and discuss the clinical features, differential diagnosis and treatment of Erythema multiforme. 10
2. Classify disorders of TMJ and write in detail about MPDS. 10

*Review done*

3. Write briefly about :

- (a) Trigeminal neuralgia 3
- (b) Oral manifestations of Renal disorders 3
- (c) Burning Mouth syndrome 4

4. Describe in detail the dental management of :

- (i) Patient suffering from Diabetes mellitus 3
- (ii) Patient suffering from Haemophilia. 3
- (iii) Patient suffering from Peptic ulcers. 3

5. Write in detail about the diagnostic test for :

- (a) AIDS 4
- (b) Viral Hepatitis 3
- (c) Pemphigus. 3

6. Describe in detail the factors controlling the X-ray beam. 10

7. Write briefly about :

- (a) Fixer solution 3
- (b) Intensifying screens 4
- (c) Osteoradionecrosis. 3

(BDS-017)

Time : Three Hours] Maximum Marks : 50

Note : Attempt any Five questions. All questions carry equal marks. Parts of a question should be attempted together.

1. Classify vesiculobullous lesions of oral mucosa.  
Describe in detail the clinical picture and treatment of any one of the mucocutaneous ocular lesions. 10
2. Enumerate the causes of trismus. Discuss pericoronal abscess in detail. 10
3. Write the oral manifestations of :
  - (a) Oral submucous fibrosis
  - (b) Agranulocytosis
  - (c) Herpes zoster. 4+3+3

(2)

4. Describe the treatment planning of :

- (a) Trigeminal neuralgia
- (b) Carcinoma tongue
- (c) Aphous ulcer (major).

5. Write short notes on the following :  
4 + 3 + 3

- (a) Pemphigus
- (b) Acromegaly
- (c) Biopsy.

3 + 3 + 4

6. Describe the normal anatomical landmarks seen  
in orthopantomograph. 10

7. Discuss the radiographic appearance of :

- (a) Periodontitis and Periodontosis
- (b) Acute and chronic osteomyelitis
- (c) Hypercementosis and cementoma. 4 + 3

8. Write briefly on the following :

- (a) Radiograph for subcondylar fracture
- (b) Radiation hazards in dentistry. 5 + 5

(3)

9. Write short notes on the following :

- (a) Intensifying screens
- (b) Exposure factors
- (c) Bitewing radiographs. 3 + 4 + 3

10. Describe the composition and actions of  
developer and fixer solutions. Write in brief  
manual processing procedure of a periapical  
film. 10

Oral Medicine & Radiology

(BDS-017)

Time : Three Hours]

/Maximum Marks : 50

Note : Attempt any Five questions. All questions carry equal marks. Parts of a question should be attempted together.

1. Describe the clinical and radiographic features of cystic lesions of the jaws. 10
2. Enumerate various red and white lesions of oral mucosa and write in detail about oral candidiasis and its differential diagnosis. 10

(2)

3. Discuss oral manifestations of Avitaminosis.

4. Classify various types of leukemias and their oral manifestations.

5. Write short notes on :

- (a) Dentao-alveolar abscess
- (b) Odontogenic cyst
- (c) Necrotising sialometaplasia.

4.

5. Write short notes on :

- (a) Exposure factors
- (b) Radio-opaque lesions of jaws
- (c) Collimation.

3.

(3)

9. Write short notes on :

- (a) Intensifying screens
- (b) Radiographic appearances of maxillary sinus involvement
- (c) Protection in Dental Radiography.

3.

10. Write short notes on :

- (a) Osteomyelitis
- (b) Viral infection
- (c) Causes of glossitis
- (d) Post Medical History.

3.

7. Write briefly about the electromagnetic spectrum and give in detail the properties of X-ray radiations.

10

8. Classify the cysts of the oral cavity and write in detail, the radiographic features of various odontogenic cysts.
