

REPORT ON STEPS TAKEN BY THE INSTITUTE

The institution has in place a regular continuous evaluation system through which the students are assessed based on their performance. Attainment of clinical competencies is achieved as detailed below:

For the regular internal assessment of students following examination system is followed for all academic years at three-month intervals;

FIRST TERMINAL EXAMINATIONS.

SECOND TERMINAL EXAMINATIONS.

SENT UP EXAMINATIONS.

- Before the date of every internal examination, the department furnishes and displays the syllabus on the department notice boards which is approved by the head of department of respective subject. Question papers are prepared and submitted to the exam cell one week before the exam date. The internal exams answer sheet evaluation is centralized.
- The internal marks are awarded after assessing student's performance in monthly tutorials, internal exams, assignments, attendance. Students are also evaluated by the faculty member via their interaction and active participation during lecture as every lecture ends with MCQ discussion and frequently asked university questions. The lectures are uploaded 7 days prior for the student to come prepared with the basic outline of topic.
- Generation of reports for teachers Weekly Class Assignments (CAs): Weekly Class Assignments on topics covered during the week and in daily home assignments are given in class in the form of a short quiz. This ensures that the student has paid attention in the classes and has also attempted all daily home assignments with the required rigor. These assignments have been found to have led to critical-thinking and self-assessment in students.
- Other than regular internal assessment test, end-posting viva's, micro discussions are also conducted in the respective departments which provides clear vision to faculty members for better evaluation of each student.

- Remedial Examination: Provision has been made for conduct of remedial examination after every Internal Exams. With this, a student who failed in the internal Exams, can now take up a modular skilling for improvement in their Academic performance.
- Aboard meeting is conducted by the internal quality assessment meeting along with all head of departments every month for evaluation of each and every student on clinical and academical front in all the subjects.
- The same council make decisions regarding the parameters of distribution of marks based on university guidelines and suggestions regarding awarding of marks to students. The decision of the same are communicated to all faculty members which ensures uniform assessment of students.

CLINICAL EXAMINATION

OSCE BASED EVALUATION FOR END POSTING EXAMS

- OSCE's basic structure is a circuit of assessment stations, where examiners, using previously determined criteria assess range of practical clinical skills on an objective-marking scheme.
- Such stations will involve several methods of testing, including use of multiple choice or short precise answers, history taking, demonstration of clinical signs, interpretation of clinical data, practical skills as case based scenarios and also actual patients.
- **SKILLS ASSESSED IN OSCES**
 - The tasks to be assessed should be of different types and of varying difficulties to provide a mixed assessment circuit. This could include **formulation of a working diagnosis, data and image interpretation, requesting and interpreting investigations, as well as communication skills.**
 - ***Objective marking scheme***
 - The marking scheme for the OSCE is decided and **objectively designed**. It must be concise, well focused and **unambiguous** aiming to reward actions that discriminate good performance from poor one. **The marking scheme must take cognizance of all possible performances and provide scores according to the level of the student's performance**. Clear instructions to the candidates on what is required of them in that station should be communicated. Alternatively, a written instruction may be kept.
 - They also have reliable availability and adaptability, which enables the reproduction of a wide range of clinical phenomena tailored to the student's level of skill. In addition, they can simulate scenarios that may be distressing for a real patient, such as bereavement or terminal illness.
- **CASE SCENARIO**
 - Case scenario will provide a simulated scenario where a detailed case study / description will be given with associated clinical details including radiographs / case material, using which the student will have to answer the specific questions and would include evaluation based on history taking, formulation of working diagnosis, differential diagnosis and treatment planning including prognosis.

- **QUESTIONS**
- The questions should be standardized with objective based assessment as the criteria for evaluation to eliminate bias.

OSCE END POSTING VIVA PATTERN

STATION NO.	EXERCISE	DURATION (minutes)	FACULTY	MARKS
1	SPOTTERS	10 minutes	Sr. Lecturer	5
2	CASE SCENARIO	20 minutes	Reader	10
3	CLINICAL EVALUATION ON PATIENT INCLUDING CHAIR/ PATIENT/ OPERATOR/ POSITIONING EVALUATION	10 minutes	Reader/Professor	10+5
4	VIVA	15 minutes	Prof./ HOD	20
