

6.1.1 STATE THE VISION AND MISSION STATEMENT OF THE INSTITUTE

“It’s not what the vision is, it’s what the vision does” -Peter Senge

A vision of an institute is a declaration used to articulate future goals in order to achieve and empower them. We at I.T.S. DENTAL COLLEGE, MURAD MAGAR believe in ideals, our core organisational values and long-term objectives for the welfare of learning students. Learning is all about experience and has an ability to push an ordinary student towards being the competent and confident one in their field.

Therefore, the vision of our institute is – *“Inspired learning for healthcare of tomorrow”*

I.T.S. institute envisions to provide the best of knowledge to the students in both theoretical and practical approach. To guide the growing scholars in their right path, the institute provides mentors to each one of them for their queries. There is escalation in educational tools available for students for finer and healthier learning. With the introduction of advanced radiographic examinations like CBCT, undergraduates and postgraduates are significantly more transparent in diagnosis and treatment planning which directly has a positive impact on patient’s health.

It is very well vocalised by *Chris Anderson – “nail the basics first, detail the details later”*

To upskill the undergraduates in basics before they set foot in clinical postings, general and dental anatomy lectures correlating with radiographic lectures are integrated in their course. The institution emphasises on its intellectual capital and advance in their technology to justify knowledge provided to students and to empathize towards their patients.

To accomplish perfection in dentistry, undergraduates and postgraduates are trained to wield on loops and optical microscopes from the start of your learning process. The students are provided with pre-implant comprehensive course with extensive training and learning process prior to their clinical experience in implantology.

Elaborating it further- I.T.S. focuses on nurturing future endeavours along with continual innovation to leave an incredible mark of professional propensity and humanitarian ethos for generations to follow. The mission of the institute is thus dissected clearly to distinct the needs of its 2 key elements - students and patients. By identifying the purpose of vision and mission of institute, one can accomplish the set goals and responsibilities towards healthcare system to have a better future.

We at I.T.S. believe in a mission that is

To foster higher levels of learning, encourage evidence-based practises and develop knowledge and clinical skills leading to undergraduate and postgraduate degrees in oral health services

To foster speciality training and research in all the disciplines of oral health sciences

To encourage research-based projects, the institute is successful in establishing full-fledged research lab with open access to students and Faculty to be skilful in research projects and publications. I.T.S. works comprehensively with superior academic profile and significant achievements. A committed management, empowered senior leadership and active

participation of nationally and internationally acknowledged faculty bestow this place with high academic and clinical potential.

The inspirational and functional tomorrow stands with day-to-day hard work and determination of today. Devoted and pellucid nature, commitment and dedication, progress and readiness to face challenges are the key objectives that define us today.
